Vertu Realities

VIP Idea Innovation dApp

Join Our dApp for Free

The new, unique VIP Healthcare app gives users, either individuals or companies, a convenient and inexpensive way to develop patentable or copyrightable ideas. Users can save their ideas (VIPs) to an immutable (permanent and verifiable) blockchain for marketing and funding.

Share Project Development
Global Project Integration and Development with the rapidly expanding Innovation Network

Participant Time Stamped Documentation
Accurate and Verifiable Innovator Participation Documentation. Markedly reduce inventor conflict and theft of IP property

Verifiable Royalty Disbursements
Royalty Distributions based on our Proprietary Project DAO Contribution Algorithms

APP FEATURES

✓ Users can choose to post their ideas to a blockchain for security, funding, or selling the idea. This feature allows for by-passing the patent system or working with the patent system depending on the user's choice.

✓ Private vs Shared - Users can share ideas for funding via the marketplace, gain subscribers to fund the idea or keep their ideas private.

✓ Patent Process - Users can have VIP create a patent application (for a fee) to handle the entire process until issuance.

✓ Teams - Users can work individually or as part of a company. The team lead selects members and can divide royalties or funding between the team and credit the team for the Product.
